Task 1

Write a C Program to display the pattern like pyramid using the alphabet.

```
        A
      A B A
    A B C B A
  A B C D C B A
```

Example:

```
Input the number of different letters (less than 26) in
the pyramid : 6

          A

        A B A

      A B C B A

    A B C D C B A

  A B C D E D C B A

A B C D E F E D C B A
```

Note that you can get the next letter of the aplhabet by adding a value of 1 to an existing letter. Run the following code to see how it works.

```c
#include <stdio.h>
int main(void){
    char alph = 'A';
    printf("alph is: %c\n", alph);
    alph = alph + 1;
    printf("alph is: %c\n", alph);
    alph = alph + 3;
    printf("alph is: %c\n", alph);
    alph = alph - 2;
    printf("alph is: %c", alph);
}
```
